MEMORANDUM FOR:

COMOR

SUBJECT:

Recovery of Cuba

1. On 23 June the Committee on Overhead Reconnaissance considered and agreed with the Navy request for recovery of Cuba as outlined in the attached memorandum.

2. On that day the Chairman forwarded the attachment with the recommendation that Cuba recovery be obtained as soon as feasible, and that the targets set forth in the attached be covered.

Cuban Requirements

1. The sighting of a possible MIG aircraft at San Antonio de los Banos on Mission 3049 and the collateral photography of possible crated MIGs on the Russian merchant ship Leninskiy Komsomol enroute to Cuba make it imperative that TALENT coverage now be obtained of all major Cuban airfields and ports to
 - a. Confirm the status of the possible MIG aircraft already noted
 - b. Determine the existence and status of additional MIGs
 - c. Determine the destination and contents of the large crates previously noted.
2. The requirement for coverage of selected areas of suspected military construction continues, particularly since the intended use of these areas is still not clear.
3. Of vital interest to CINCLANT with respect to the use of his aerial reconnaissance capability in an emergency situation is the determination of Cuban Radar Order of Battle. Suspect areas have been established through ELINT and collateral reports and photographic coverage is desired to confirm or deny the existence of radar at these points.
4. The requirement of the Commander Naval Base Guantanamo for current intelligence on the forces in his immediate area which present a threat to the Base continues as before.
5. Accordingly, it is recommended that a flight be scheduled at the earliest practicable time to cover the specific objectives listed in enclosure (1).
